

HS-M10-72/2HP
525~ 550W

Product introduction

With the high-efficiency 182 series PERC cell half-cell technology, the product has higher output power and excellent performance in terms of shading loss and temperature coefficient. Meanwhile, applying the cell-cutting technology has effectively reduced the risk of hot spots of high-power components, and it shows better power generation performance in system applications with higher reliability.

Output power tolerance	0~+5w					
Temperature coefficient of Pmax	-0.360%/°C					
Temperature coefficient of Voc	-0.280%/°C					
Temperature coefficient of Isc	0.050%/°C					
Standard test conditions	Irradiance1000W/m²,batterytemperature25°C,spectrum am1.5g					

Application conditions			
Solar Cells	Mono PERC 182x182mm	Front Cover Glass	3.2mm high light transmittance,low ir on, tempered glass
Number of Cells	144 (6*24)	Frame	Anodic alumina alloy
Component size	2279*1134*35mm ±2mm	Component weight	27.5KG±3%
Connection box	IP68,three diodes	Connector	QC4.10-35(1500V)
Crosssectional area of outputconductor	4mm² (IEC) ,12AWG (UL)	Output wire length	300mm (+) /300mm (-)

Structural parameters			
Maximum system voltage	DC1500V (IEC)	Maximum staticload,front	5400Pa (1121b/ft²)
Operating temperature range	-40°C~+85°C	Maximum staticload,back	2400Pa (501b/ft²)
Maximum rated fuse current	25A	Through hail test	25mm diameter,impact speed23m/s

HS-M10N-72/2HP

570~590W

N-type high-efficiency PV module

Product Introduction

Adopting efficient N-type TOPCon battery slicing technology,the conversion efficiency reaches 22.8%;N-type batteries naturally have no photo induced attenua-tion(LID);Passivation contact battery technology enables the product to have a better tempera-ture coefficient and higher power generation compared to conven-tional components in working conditions;Multi density main gate technology,better light utilization and current collection ability,effec-tively improving product power output and reliability;Better weak light response enables the product to have higher pover output compared to conventional com-ponets under low light conditions such as haze and cloudy days.
